

## REMARKS

By the foregoing amendments, the claims have been amended to omit multiple dependencies. The specification, claims and abstract have been amended (i) to better conform them with U.S. format and English-language syntax, and (ii) to address a number of other formalities.

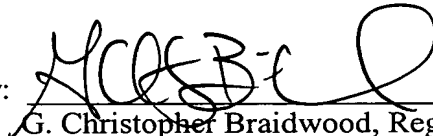

No new matter has been added by the foregoing amendments to the specification, claims and abstract. Support for the amendments can be found, for example, in the claims of the application as originally filed.

The specification has also been amended to include a specific reference to the international (PCT) and Chinese applications to which claims of priority are made. The application title has been amended in view of the contrasting English-language titles set forth in the publication of the international application (WO 2005/013553) and the translation thereof submitted herewith.

Respectfully submitted,

MARSHALL, GERSTEIN & BORUN LLP
